

Grease

"Summer"

Visit "[Summer](#)" on MotoLyrics.com

She doesn't see the coming fall
She doesn't show no fear at all
Bring on autumn moon or the driving rain
I only hope I see her face again

[Chorus]

Everything is gonna be alright when summer comes
The darkest stars will burn so bright when summer
comes
We will open up our bodies to the warming of the sun
When summer comes

I will wait in the silence until she returns
To melt the frozen prison round this fool who never
learns
Every living thing that's born must have it's end
What winter takes away, spring brings back again

[Chorus]

Summer doesn't feel the coming frost
And she doesn't yield to pain or loss
Death where is thy victory where is thy string
When every year we hear the birds of summer sing

[Chorus]
