

Great Big Sea "Heart Of Hearts"

Visit "[Heart Of Hearts](#)" on MotoLyrics.com

I drove a million miles with you,
I broke a million smiles with you,
I told a million lies with you,
What else would I do,

We answered every sirens call,
We watched the stars collide and fall,
Stood back to back against the wall,
We ran before we crawled;

[Chorus]

All together now until the end when this stories over
and a new one begins;

In my heart of hearts there is a special place
For every man who shook my hand
Every girl that kissed my face;
In my heart of hearts there hides no shame
In my heart of hearts I'd do it all again;

You always said you were the lucky ones,
You always said the night had just began,
We always stayed up til the morning sun,
And whistled something until the dawn;

[Chorus]

Never had a destination or a protical of mine,
Never had a child to guild us down the tide,
Never had no money but I always had the time
To finish all your lines;

[Bridge]

So far behind us so far to go;
A melody reminds us what we've always known;
Time will never find us in the secrets of the show;
Up or down the road so on we go;

[Chorus]
