"Follow Your Heart"

Visit "[Follow Your Heart](#)" on MotoLyrics.com

In this space and time that we inhabit
Sometimes don't we feel like an exhibit
Growing up isn't something easy to do
Feeling so free we can't lose

Follow your heart not your head
Follow the voice within
Follow your heart not your head
It's calling you again

When wrong speaks to you in the night
Right isn't far behind in the light
Our little minds wander away sometimes
As long as they return we live fine

When your dreams fall beneath your feet
Out souls reach up searching for peace
Go ahead reach up a little higher
Don't leave 'till you've felt the power
