Well everybody knows what I'm holding here
Tell all your friends I'm not fooling around
Cuz I'll point this barrel at any one of their heads
Tell all your friends to get down on the ground
Oh baby, baby I'm screwed up so bad
Come back, come back will you come back to me
Yeah you know you know that I'll treat you so right
Tell all your friends to stay down on the ground
It's loaded I promise anybody want to try and test me
It's loaded, it's loaded you don't believe me then I'll
make sure you see
Last chance to make up your mind
You'd better think it through, your lives on the line
Tell all your friends I'm not fooling around
Tell all your friends to stay down on the ground
Oh baby, baby I'm screwed up so bad
Come back, come back will you come back to me
I brought this gun for you, for you
It's loaded I promise anybody want to try and test me
It's loaded, it's loaded you don't believe me then I'll
make sure you see
It's so simple I'm not that bad
Just love me, love me that's all that I ask
I like to think about what could have been
I like to think about having you back
I like to think about what could have been
Before all this bloodshed began
