Well I ain't got much time so I'll get to the point  
Do you wanna share a ride and get the fuck out of this  
joint?  
I've got an impulse so impulsive that it burns  
I wanna break your heart until it makes your stomach  
churn

I got to know if you're the one that got away  
Even though it was never meant to be

So stay, stay the night  
Because we're running out of time  
So stay the night  
I don't wanna say goodbye  
So stay the night  
Because we're running out of time  
So stay the night  
Well I don't wanna say goodbye

I'm just sick and tired of feeling so alone

Well I don't understand the point if you have to go  
home  
Wont you stay and cure the circles 'round my eyes?  
Well we can watch the stars until the sun begins to rise

I got to know if you're the one one that got away  
Even though it was never meant to be

So stay, stay the night  
Because we're running out of time  
So stay the night  
I don't wanna say goodbye  
So stay the night  
Because we're running out of time  
So stay the night  
I don't wanna say goodbye
