

Green Jelly

"Down"

Visit "[Down](#)" on MotoLyrics.com

It's hard when
You try to survive
And try to hold on
As we will go down
We will fall down

One day I will go into a new state of mind I guess

Until that day
I'll try to know my name

I try to blink but go numb
So it throws mud in my eye
I gasp for air but there's none
My lungs explode inside

I should know better than to let things get to me
I should know better than to let let them get to me
I should know better than to let let you get to me
I should know better than to let me get to me

It's hard when
You try to survive
And try to hold on
So you will go down
And we will go
