Well you're fresh out of love touching hearts with a glove
You drop your name and lead 'em on
And the start of our spark was a matter of the dark
Let's adjust and see
We made a hard call, laying down the law
What isn't working? Why am I searching?
Lies need replacing, facts need some facing
We knew it all along

Chorus:

Still I'm finding it hard letting you go
Cause you'll take me all away
I'm finding it hard letting you go
When silence has all the say

Well I rob as I earn and I win out of turn
It's a fact that I don't want to face
And I learn every time but the knowledge is a crime
And I rest my case
I watched you close,
You tried to impose the way that you felt on the way
that we chose
You let my heart fall, breaking in the law
Matter-of-fact is no way to act when we've been
pretending there's not an ending,
You knew it all along

(Chorus)

My loss is your loss
I'll break at your cost
It's like you're losing to win
Feelings compress into words that are less than the
weight that I need you to know
Your choice is polite, but the truth wants a fight when
the timing will never be right

Still I'm finding it hard letting you go, cause you'll take
me all away...
