I've got hope but I can't talk about the future  
I've got desire but I can't exercise it on my own  
Time won't solve this predicament  
Time won't solve this predicament  
I've got pain but to tell it hurts the one I love  
I've got strength but it attenuates every day  
Time won't solve this predicament  
Time won't solve this predicament  
Troubles never go away  
They just resurface on another day  
I've got heart but now it's weakened by an empty space  
I've got soul but it's been soured by the bane of hate  
Time won't solve this predicament  
Time won't solve this predicament
