You can call it love, you can call it a curse  
Call it what you want, in a heavenly verse  
You can call it black, you can call it blue  
You can let this lesson be a message to you, oh  
You can let this message, be a lesson to you, yeah

You call it this, you can call it that  
Just what it is, lord where it's at  
You can call it magic, you can call it tragic  
You can let this lesson be a message to you  
You can let this message be a lesson to you  
Do it one day

You can be confused, honey if you choose  
You can not miss with that stuff that I use  
You can think it's evil, you can think it's true  
You can let this lesson be a message to you, oh  
Oh you can let this message be a lesson to you, oh  
Oh give us a choice now
