You're on the payroll,  
Yet your boss doesn't know you.  
You're under 'is control,  
to kill and don't argue.

But when the right time come  
When the right time come  
You guns and your payment(?) , nor your boss  
I said your guns, nor your payment(?), nor your boss  
They just can't help you.  
Is your payroll boss, now I think so...  
Is your payroll.....

You shoot your brother down, down to achieve a salary.  
But woe be unto the many, that put his trust in vanity.

But when the right time come  
When the right time come  
You guns and your payment(?) , and your boss  
I said your guns, and your payment(?), and your boss  
They just can't help you.  
Is your payroll your boss, now I think so...  
Is your payroll, you're under its control..
