I've been pouring whiskey on your memory  
I cant seem to drown this hurt inside  
Bottom of the bottle leaves me empty  
I need something strong to ease my mind

I need a pain killer  
Just one night of sleep  
Someone who will hold me close  
And get me over him

And it'll taste bitter  
Stranger set me free  
I need a pain killer  
Before this pain kills me

Never thought I'd have to love another  
Never been the kind to sleep around  
I wish it was a pill and not a lover  
It's gonna be so hard to swallow down

I need a pain killer  
Just one night of sleep  
Someone who will hold me close  
And get me over him

And it'll taste bitter  
Stranger set me free  
I need a pain killer  
Before this pain kills me

And It'll taste bitter  
Stranger set me free  
I need a pain killer  
Before this pain kills me

I need a pain killer  
Before this pain kills me
