Verse 1-

You're friends have left without you now.
No sticks and stones could ever break your bones- how
can you let those
plastics make you frown?

Pre Chorus:

Wake up and drink this and let it fill you up with hope.
Just let it hit you hard...

Chorus-

And let go... baby just let go now.
Let go- get up and go and snip the chord to the anchor
that binds you.

Verse 2-

And my guess is you won't even pay the slightest
attention to me.
All these words (baby) there just no use- want me to
just let you be.

Pre Chorus-

Chorus-

Bridge-

Well you my ways, you know my words, you know my
hands, and you
know whatcha heard and I can't stand up any taller.
So come out from beneath the bed instead...

Chorus outro-
