I can't be your weather  
'cause' if it rains then it rains  
I can't be your lover  
'cause' the feelings would change  
I can't be the wind  
'cause' the wind blows too free  
But if you want a true companion  
Don't forget about me  
(chorus)  
Don't forget about me  
When your heart's in the shade  
When there's no one to hold you  
And you've fallen from grace  
When the spotlights come blind you  
And you can no longer see

I'll be right there beside you  
Don't forget about me

Friends never leave you  
They're a two way street  
They'll always believe in you  
When you've ceased to believe  
And I'll still feel the same  
If you're a friend in need  
'cause', I'll always love you  
Don't forget about me  
(repeat chorus twice)
