I should have known that you were gone back in
Germany
You told me in the dark while I was sleeping
Then you slept through the sunrise
As it washed across your face
And all that I had heard were our hearts beating
(chorus)
Talk to me while I'm listening
While this love has a voice that we both
Can hear
Before you let it go...
The greatest love I've ever known
Won't you please
Talk to me
While I'm listening

I cannot find a place to put this love away
Or lose the thought of sunlight on your face
I thought I heard your voice
Say I love you today

But it was only the sound of my heart breaking
(repeat chorus)
How I wish that I could take us back to Germany
I would stay awake and you would talk to me
Yet for every drop of rain I hear
There's bound to fall another tear
Upon this page of song of my heart aching
(repeat chorus)
(tag)
Before you let it go...
This greatest love I've ever known
Won't you please
Talk to me
While I'm listening
Talk to me
Talk to me
