

Group 1 Crew "What Yo Name Is"

Visit "[What Yo Name Is](#)" on MotoLyrics.com

Yo introducing the improvement of a natural act
You hear this beat drop and watch it move the front to
the back
And it's actually time to react to a crew that's in fact
Bringing back the illest raps we know the industry lacks

So what you know about this hotness
Standing in the back bumpin' fists, I bet you didn't
know
That we would come with this, hip-hop with a twist
Hey DJ you better make 'em dance to this

Turn it up, turn it up, put down all your stuff
Not sweatin' hard enough you gotta work it up
Here we go to the floor, I tell you once more
Chop it up 'cause you standing like a vegetable

Hot like safari, shop like a Gotti
We walk in and shock everybody
Me and my boys, ya we rock the party
Soon as we start to run everybody say

Ooh, what yo name is, who you came with?
Can't stop movin' your crew they make me say
Ooh, where your team stay, can you work with me?
Just come with us and let us lead the way

We got that swagga that's hotta than summer time in
Nevada
We rockin' shows that are harder than most of the stars
y'all follow
Ain't to stopping the power of three destined by the
Father only
To make y'all sing a melody that carries volume

We laid low for a while but we couldn't hide the style
Of two emcee's a vocalist who bring that funky sound
Check your local listings 'cause we comin' to your town
Bringing something new that got the earth shaking its
ground

See who you know can rock a crowd the way we do

Then go to Cali and make Hollywood pump its fists too
Fill up a secular venue and get love from them too
And not for a moment ever have to sacrifice the truth

Hot like safari, shop like a Gotti
We walk in and shock everybody
Me and my boys, ya we rock the party
Soon as we start to run everybody say

Ooh, what yo name is, who you came with?
Can't stop movin' your crew they make me say
Ooh, where your team stay, can you work with me?
Just come with us and let us lead the way

Due this is Group 1, one mind better believe that we on
time
Never we bringin' the weak rhymes baby you know
these are hot lines
Mind over matter batter-up get a grip
Our God is wit it, get it krunk and play it loud in your
whip

They call us spiritual but miracles are all we predict
When spiritually we turn our faith into a physical hit
And got the whole world askin' who we are and our
click
It's quick to admit that He's the reason why we exist,
it's like

Ooh, what yo name is, who you came with?
Can't stop movin' your crew they make me say
Ooh, where your team stay, can you work with me?
Just come with us and let us lead the way

What yo name is, who you came with?
Where your team stay?
