Life on the edge of death overcoming her.
Living for the one who torments your mind.
Suffering for everlasting pain and fire.
Lusting after darkness and screaming in hell.
Screaming in hell.

Life on the edge of death overcoming her.
Living for the one who torments your mind.
Suffering for everlasting pain and fire.
Lusting after darkness and screaming in hell.
Screaming in hell.

(Chorus):

Ride on through my mind (3x)
God I love you.

Sister I feel every bit of your pain.
The life I once lived used to be the same.
Enjolie you've taken the very first step.
It's not an easy thing to change your life.
Change your life.

((Chorus) (Chorus)))

Sister I feel every bit of your pain.
The life I once lived used to be the same.
Enjolie you've taken the very first step.
It's not an easy thing to change your life.
Change your life...
(((Chorus)))
