Visit "[Stars](#)" on MotoLyrics.com

2:00 on a Friday morning
Heard a voice
Thought I heard the phone ring
I was hoping it was you
Looked outside and I saw it raining
Saw a face and it started fading
Slowly into view

If time could just stand still
I wouldn't let you walk away
Find the words I meant to say

All my life I've waited for one love
That I can fall into
And every line of every song I hear
Reminds me of when I first saw you
When I saw stars
When I saw stars
I saw stars

There were days that I watched you sleeping
I wondered what you were dreaming
I hope you know you're not alone

If time could just stand still
I wouldn't let you walk away
I'd find the words to make you stay

All my life I've waited for one love
That I can fall into
And every line of every song I hear
Reminds me about you

All my life I've waited for one love
That I can fall into
And every line of every song I hear
Reminds me of when I first saw you
When I saw stars
When I saw stars
I saw stars

I have made it through the dark
I wait in the covering
Will my broken heart
Start to beat
It's not a mystery
What you do to me

All my life I've waited for one love
That I can fall into
And every line of every song I hear
Reminds me about you

All my life I've waited for one love
That I can fall into
And every line of every song I hear
Reminds me about you

(When I saw you)
When I saw stars (I saw stars)
When I saw stars
(When I saw you)
