Send us to die, to add to the gore  
We're on a wartime supply  
Rewrite the laws, to fit to your cause  
To you we are nothing but whores

An arm, a leg, and then replaced  
You use us, then spit in our face  
Disposable kids, why the fuck would you care  
'Bout some coffins on your own army base

Genocide, you're terrified  
Of what?  
You wait, eternally

WAR  
What have you done to me, why can't you see  
Don't want your  
WAR  
We are expandable, we are commodities of war

Cover up lies, inventing the truth  
It's making no difference to you  
As long as you gain and race in the polls  
The killing machine will remain

We die, we kill, for politics  
The whole thing is making me sick  
Democracy what? A slug in our gut?  
And shell shocked and proud we should rot?

Just pain, no gain, to you it's all the same  
They fool, us all, in propaganda's name

[Lead: Fredrik]

Regret? No way, their own agenda's set  
Invade, destroy, another dollar made
