Can't see the consequence, the world turns into ice  
No reason to pretend, it's now, we die  
So hard to comprehend, we're hanging by a thread  
Humanity has failed, we're dead

Lost forever, here we are  
It's sickening to see  
Thought that never, it's go this far  
So future here you go - here's your dying world

None left to sacrifice, we've sucked our planet dry  
Just simple ignorance, you ask, the lie  
Who cares about the world, exploit it til it's lost  
Who ever stopped to think - our cost

Eliminate, our legacy  
Free to desecrate
