Wait, wait, wait, there's something that I gotta say
It'll take, take, take, just a minute so don't walk away
I search in circles for a remedy to fight the poison that
is killing me
It's like I'm falling fast head over feet, is anybody
listening?

I wanna believe
I wanna believe in love again
I wanna believe
I wanna believe in love again

Tired of living this way, tired of everyday
So will You help me?
I wanna breakthrough
I wanna believe in You

Hey, hey, hey, why is everyday the same for me?
Fake, fake, fake, just pretend what I'm suppose to be
I need an answer for my remedy, I need a savior ?
cause I'm in too deep
I reach up, will You reach down here to me?

I wanna believe
I wanna believe in love again
I wanna believe
I wanna believe in love again

Tired of living this way, tired of everyday
So will You help me?
I wanna breakthrough
I wanna believe in You

You found me, found me
You were looking for me
You found me, found me
You were looking for me

You found me, You were waiting for me
I can see Your love
You found me, You were waiting for me
I can see Your love

I believe in You, I believe in You
I believe in You
I believe in You, I believe in You
I believe in You

I wanna believe
I wanna believe in love again
I wanna believe
I wanna believe in love again

Tired of living this way, tired of everyday
So will You help me?
I wanna breakthrough

I wanna believe
I wanna believe in love again
I wanna believe
I wanna believe in love again

Tired of living this way, tired of everyday
So will You help me?
I wanna breakthrough
I wanna believe in You
