Facing the truth bout your fucking life  
Think it's better when you're dead  
Shitass perspective from the bottom line  
Gotta stop to live in dread

Fear fills your head - what an empty place  
Have to stop it soon  
There must have been a reason  
There must have been a reason  
A reason for you, too

No matter what you say  
No matter what you do  
You gotta see the light  
Shining bright inside of you  
Believe inside of me  
Believe inside of you  
The wheel of life will turn forever

God only knows what you are waiting for  
Accept your state of mind  
Goddamn religion - the biggest whore  
Close your eyes and look inside

Science searching for the final answer  
Will they ever see  
Plan of life - inside of us  
Forever it will be

This is the masterplan  
Never changing - never changing  
This is the masterplan  
Time you're spending - neverending
