I am in love with God
I am in love with stars
I am in love with something
Coming close from far

You are in love with God
You are in love with stars
You are in love with something
That'll tell you who you are

They need love
(They need love)
They need God
(They need God)
They need guidance from above
(They need guidance from above)

They need love
(They need love)
They need God
(They need God)
They need guidance from above
(They need guidance from above)

You are in love with God
You are in love with stars
You are in love with something
That'll tell you who you are

Love God, love God and affection
You know exactly what it means
Still you're only in your teens

They need love, they need God
They need guidance from above
(Still you're only in your teens)

They need love, they need God
They need guidance from above
(You know exactly what it means)

They need love

(They need love)
They need God
(They need God)
They need guidance from above
(They need guidance from above)

They need love
(They need love)
They need God
(They need God)
They need guidance from above
(They need guidance from above)

They need love
(They need love)
They need God
(They need God)
They need guidance from above
(They need guidance from above)

They need love
(They need love)
They need God
(They need God)
They need guidance from above
(They need guidance from above)

They need love
They need God
They need guidance from above

They need love
They need God
They need guidance from above

They need love
They need God
They need guidance from above

They need love
They need God
They need guidance from above
