Do you remember how we made it through the rain
said together we'd remain
you and me in love forever
never imagined we would go our seperate ways
that my life would be a maze
hoping to find you at the end

Chorus:

Can we just love again kiss again
I just wanna be us again
there's no reason to pretend
it's evident that i'm lost without your love
and if we just hold each other close again
we can make it to the very end
baby I will leave you never
I just wanna spend forever with you

Mya:

How can i forget cos when you came i knew for sure
what my heart was beating for
how could i take you for granted
and now that your gone everyday is so unclear
I think I'm running out of tears
how can I get back to life when you were here with me

Chorus

If we give up our minds
and let the feeling in our hearts take over
baby then we'll see
how this love should have been
(everything we should have been)
before my heart falls apart for good

Chorus
