Visit "[Her Design](#)" on MotoLyrics.com

I've been sitting here all night trying to figure out how I felt.

Everybody else just sits... sits and stares.

Wandering eyes, never you mind - I'll keep the focus from my heart.

Baby I believe, I believe, I believe I'll get you upstairs.

Girl you look so good in the evening light
When the moon is right and the stars are bright.

I know not everything that you say is right.

Ain't no way I wanna start a fight,

Ain't no way I wanna start a fight,

There ain't no way I wanna start a fight... tonight,
tonight.

While I was sitting here all night trying to figure out how I felt,

Everybody else just sat... sat there stoned.

Your innocent eyes never should hide - I'll keep your picture by my side.

Baby I believe...

(Chorus)

Celebrated by your soul:

"Hey sir, can I let you know, I am cool with everything",

Separated by a land that never ends

(Chorus)
