

## Gyroscope "Silver Heart"

Visit "[Silver Heart](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Please don't wake me, I really need some rest and I'm  
all messed up.  
I'm all messed up  
I hope to get away but I guess I will confess that I'm all  
messed up.  
I'm all messed up - come on!

All past mistakes forgiven  
You made your cutrain call  
That night down by the river,  
They must have seen it all.  
It's a shame - that's what it is.  
See the rain - come wandering

I'm all messed up...  
Upset. Watch your footstep.  
Follow in the backstreet.  
Makes me see red  
Take another step and step down.  
Standing on a rooftop shouting out (rooftop shout it  
out! )

It's a shame - that's what it is  
See the rain - come wandering  
It's a shame - that's what it is  
See the rain - come wandering

I took the liberty away  
... and made the non-believers pay  
Darling, darling, please!  
Help me try to mend your disease... we're dying

Please don't wake me, I really need some rest and I'm  
all messed up.  
I'm all messed up  
I hope to get away but I guess I will confess that I'm all  
messed up.  
I'm all messed up
