I could remember, a kid came and warned them
Then if you don't leave death will soon be upon you
There's crying, there's dying there is really much evil
Somebody wake me this isn't possible

Do you wanna live do you wanna die?
Do you wanna live do you ever wonder why?
God bless our souls they're taking us over

Shocking the nation the world's newest nightmare
We'll later be buried by world spread warfare
Somebody's lying, people are dying
the government is it driven by one man
Do you wanna live do you wanna die?
Do you wanna live do you ever wonder why?
God bless our souls they're taking us over
Noooh!

I could remember, a kid came and warned them
Then if you don't leave death will soon be upon you

Do you wanna live do you wanna die?
Do you wanna live do you ever wonder why?
Do you wanna live do you wanna die?
Do you wanna live do you ever wonder why?

God bless their souls they're taking us over

Ahhhhh!

...Heaven or hell? (hidden message)
