

(Hed) PE "Novus Ordus Clitorus"

Visit "[Novus Ordus Clitorus](#)" on MotoLyrics.com

When will you open up your eyes
By the time it's almost over you
Get up and get up and
Fight, fight, fight, fight
Fight, fight, fight, fight

Announcing the birth of the new world order
As pronounced by the seers of doom
Bow down to the almighty dollar
Who's at the top and where are you?

A Trojan horse is inside the border
A secret hidden in plain view
It's funk, dude, nigga, bring me the doctor
This black magic world white collar

I gotta get out, out of California
New world order, new world order
I gotta get out, out of California
New world order, new world order
911 huh, now watch your back

Yeah, 120 years ago
The illuminate surfaced in Bohemian grove
33rd degree, free masons of old

The American doctor
The skull and posts
The matrix, sign of the sacred
Geometric, doctrines of hatred

Separation
Programmed for generations
The perfect death of a nation

I gotta get out, out of California
New world order, new world order
I gotta get out, out of California
New world order, new world order

I gotta get out, out of California
New world order, new world order

I gotta, gotta, gotta get out

People of America
Please stay calm
Please stay in your homes
The terrorists are coming to get you

Please be very afraid
Please be very afraid
Pay no attention to your minds eye

Check, check, yo
I woke up, in a nightmare
I want to know, is it too late?
The future is not yet written
And our numbers are too great

They see us like cattle
They see us as profane
They sit at the top of the pyramid
American royalty what's the big secret?

I don't want to go to Guantanamo bay
I don't want to go to Guantanamo bay
I don't want to go to Guantanamo bay
Don't let them come and take me away

Don't let them come and take me away
Don't let them come and take me away
Don't let them come and take me away
Don't let them come and take me away

Get out, get out, get out
New world order, new world order
Get out, get out of California
New world order, new world order

Get out, get out of California
New world order, new world order
Get out, get out, get out

Fight, fight, fight, fight
Fight, fight, fight, fight
