Despair has a face
And all these wounds remain unhealed
Bless the killed and enslaved
Our own hearts are our loves will
Thrilled to start all over again

Crawl down dead lover's lane,
The maze of memories stained
And it sucks the blood right out of my heart

Fear has a name
Written on our hallowed ground
With their tears
Those words never saved
To fear your heart and our dreams
Are these beyond our grasp?

Crawl down dead lover's lane
The maze of memories stained
And it sucks the blood right out of my heart

Scream out love's name in vain
Erase the pain again
And move yourself across the dark
Dead lover's lane

Crawl down dead lover's lane,
The maze of memories stained
And it sucks the blood right out of my heart

Scream out love's name in vain
Erase the pain again
And move yourself across the dark

And it sucks the blood right of my heart

Right out of my heart
