Her Heaven's a lie to those who threw away the key
Her God is a lie when he fell for the heart of her
believes
And you can't bend the river of her dreams
Or understand the divine word she speaks
(Chorus)
Venus denies your serving tides above dark waters
You can't quench your thirst with the fear hiding away
from the day
Venus denies you in your dark waters
The moon kissed the sun and now we hold her in our
blood
Her Savior was never wrong crossed peace with nails
Thirty pieces of silver never a trace of a stain, she'll
always be free
from the elders of your sins that made you weak
as your world started crumbling
(Chorus)
Venus denies your serving tides above dark waters
You can't quench your thirst with the fear hiding away
from the day
Venus denies you in your dark waters
The moon kissed the sun and now we hold her in our
blood
(She was in our blood)
(Chours)
Venus denies your serving tides above dark waters
You can't quench your thirst with the fear hiding away
from the day
Venus denies you in your dark waters
The moon kissed the sun and now we hold her in our
blood
In Our Blood (x4)
