

## Haemorrhage

### "Amputation Protocol"

Visit "[Amputation Protocol](#)" on MotoLyrics.com

Tourniquet applied above the bleeding wound  
Constricting blood flow along necrosed tissues  
Dislocated limbs infected of gangrene  
There is no salvation for the extremities

Anatomic loss...  
Obnoxious protocol  
Drastic surgery  
Amputate it..

Patient rushed to the emergency room  
Decision is hard but it must be done  
Slicing the muscles sawing through the bone  
A clean cut to leave a beautiful stump

Anatomic loss...  
Obnoxious protocol  
Drastic surgery  
Amputate it..

Wrong surgery!

PO Complications - The problem remains  
Evaluation reveals a fatal mistake  
Malpractice occurred - diagnose confirms  
Amputation of the wrong extremity

Anatomic loss...  
Obnoxious protocol  
Drastic surgery  
Amputate it..

Amputation protocol  
Amputation for you all
