"Edible Necrectomy"

Masticating neoplasm... craniopharyngioma I eagerly
ingest
Peritoneal sacs of pus... muciferous vesicles devoured
with zest

Succulent carnage - edible necrectomy
Rank tissues banquet - edible necrectomy

Macrosystic bowels I extract... the panchreatic ganglion
I fiercely resect
Anaslomosed hepatic duct... empyaema spurts from
the
lacerated rectum

Succulent carnage - edible necrectomy
Rank tissues banquet - edible necrectomy

Ingurgitated scabs - excised anal tract
Encephalitic mush - I'm gorged on gristle

Giant ademona I munch... the gangrenous muscles I
hardly
digest
Razed hystorreic slough... squamous epithelium sliced
to
shreds

Succulent carnage - edible necrectomy
Rank tissues banquet - edible necrectomy
