Disintering rotting carrion  
Posthumous secretions flowing out  
Manifested Livor Mortis  
Autolysified tissues breaking down

"Exhuming corpses Enshrouded in Putrilage  
putrescent embalment oozes frm their rotting flesh  
Soapy secretions, Adipocere...  
The stench of the cadavers bring me no tears"

Alchemy of decomposition  
Curdled suppuration in the bodily orifices  
Necrobiotic alterations  
Ammoniac sulphide is vilely released

Putrefaction... Putrilage  
Perpetuation... in decay

"Exhuming corpses Enshrouded in Putrilage  
Special guests for another secret carnage  
Depraved morticians rapturing the dead  
Taking their bodies out of their fucking graves"

Visceral disintegration  
Fetid emanation of cadaveric fumes  
Post-mortem deterioration  
This beautiful cadaver is ready to be exhumed
