Coagulated gore of cadaveric festers  
Stagnated for days in your putrid intestines  
Fermenting juices of hepatic secretion  
Soured bile foam hastens ulceration

Decomposing visceral wrap  
Suppuration flows from each scab  
Gangrened innards, rotten and grey  
Fungus grows upon decay

Organic decadence by internal necrosis  
Corporal purulence foments microbiosis  
Abdominal cavity swollen by fumes  
Oesophagus numb, choked by grumes

Liquidized vomit of rot  
Disgorging black digestive clot  
Corrosive stomach contents  
Necro-emesis takes place *[REPEAT]*

*The carcass spew, on the mortuary slab  
This posthumous legacy, in the ultimate spasm*
