Repairing extremities...

Limbs affected by severe lesions

New prostheses made of steel,

Mishandling causes infection

Prosthetic members - bone plates and hip nails

Fungo-bacterial decay

Bone screws, extensors and femoral heads

Metal corroding your flesh

Crystal eyeballs, gastric bands, weird palatal  
obturators

Gangrened adjacent tissues-macerated in suppuration

Plastic meniscus eroded cartilage

Heart valves, cardiac arrest

Uretral conduits for urine drainage

Odd drain-bags for excrements

Polyurethane bones - deformed plastic legs

Skeletal insertions...

Putrefy

Replace missing body parts

with artificial extensions

Orthopaedic surgery - septic allograft rejection

Prosthetic members - bone plates and hip nails

Fungo-bacterial decay

Bone screws, extensors and femoral heads

Metal corroding your flesh
