

## Haemorrhage

# "Incinerator Of Cadaveric Leftovers"

Visit "[Incinerator Of Cadaveric Leftovers](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Mutilated body parts autopsied human pieces  
Portions of sectioned bowels full of fetid feces  
Septic wastes from the morgue must be eliminated  
Piles of putrefying remains will be incinerated

...Corpses on fire  
...Sick funeral pyre  
...Crematory fumes  
...Blackened remains

Rectal gases deflegrate causing little explosions  
Rotten innards melt away internal combustion  
Smouldering sebaceous cysts calding pulped brain  
Evaporating corporal fluids turned into methane

...Corpses on fire  
...Sick funeral pyre  
...Crematory fumes  
...Blackened remains

Blazing eye-sockets lungs fume away  
Roasted organs your heart is aflame  
Boiling testicles fused membranes  
Crepitating ashes of carbonized remains.
