

## Haemorrhage "Oozing Molten Gristle"

Visit "[Oozing Molten Gristle](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Putrefied to the bone  
Necrobiosis undergone  
Hypostasis stains your back  
Livor mortis is turning black

Oozing cavities - foul necrosis of the skin  
Rancid Putrilage - vile corruption of the flesh

Nematodes - protozoa  
Ileum plagued with bacterial spawn  
Reeking ammonia and sulphide  
Gas ruptures your soggy insides

Oozing cavities - foul necrosis of the skin  
Rancid Putrilage - vile corruption of the flesh

Molten gristle - flaked tissues  
Rotting innards leaking foetid fumes

Lard decays ... fermenting entrails

Melting guts ... pungent fluids

Liquefied into mush  
Muscles macerated in septic pus  
Sticky visceral jelly  
Dissolved by autolytic enzymes

Oozing cavities - foul necrosis of the skin  
Rancid Putrilage - vile corruption of the flesh

Molten gristle - dead tissues  
Rotting innards leaking foetid fumes ...
