[English Translation]

Uh... Again tonight there's the fleeting starry sky
Uh... The shining stars are hanging with wishes...

Although worries will always endure,
The door is opening

Walking, falling, you're the one that picks me up and
gives me strength
So you'll become a proud star I'll sing
Now I won't do less than my best, I'll become stronger
like...

Unswaying love, this important love
No one else is so precious
This night is surely uneasy but
We're the one that won't lose, but go on living...

Destiny is such a brutal thing
Can't we follow our expectations?
It's scattering, falling but this hand is here
I'm carrying painful secrets for you while I sing
Think of, believe, don't forget this wish

Because who will surely hide weakness
Aren't you definitely scared?
I'm sure I'll come to understand
We're the one that won't lose, but go on living...
It was fleeting and no more...
There is no need for sadness
