You're trapped inside my Cyber World  
Consumed up as my web unfurls  
No secrets left for our mankind

My virus lurks throughout your veins  
I'm spreading there inside your brain  
A Trojan Horse that eats your mind

Cyber World  
Cyber World  
I've got your power

Cyber World  
Cyber World  
I will devour, yeah

At speed of lies I will connect  
I search and surf as I infect  
Computerized catastrophe

Your information what I steal  
I scan you till you are unreal  
Transmit your power into me

Cyber World  
Cyber World  
I'll steal your mind

Cyber World  
Cyber World  
For all mankind, yeah

you're dying in my Cyber World  
you're lying in my Cyber World
