He kept his hand held high in the clouds
He made us bow down, shout out loud
He worked the crowd like a man possessed
But there's a church burning in his chest

I think we've been here before
Salvation knocked on our door
Heaven was letting us in
But then we just had to stop and start all over again

This is our last revelation
We had such great expectations
Have we learned nothing at all?
A real close call is just the same as damnation

We got the free world at arms length
They had the vision, desire and strength
We felt the faith works slipping away
When we would pass the collection plate

I swear we've been here before
Salvation knocked on our door
Heaven was letting us in
But then we just had to stop and start all over again

This is our last revelation
We had such great expectations
Have we learned nothing at all?
A real close call is just the same as damnation

This is our last revelation
We had such great expectations
Have we learned nothing at all?
A real close call is just the same as damnation

This is our last revelation
We had such great expectations
Have we learned nothing at all?
A real close call is just the same as damnation
