Light up the candles and open the gate  
The bell is ringing for the souls with no fate  
Our little angels, all lost in this world

Death is transcending, they will resurrect  
Not from their grave, but they've come to collect  
In danza macabra, the dance of the dead

We honor the souls, we praise the departed  
Now lo calavera catrina is glowing  
The eyes of the skull bursting into a blaze

All of the damned - dia de los muertos  
All of the damned - los angelitos, los inocentes  
So listen, beware, remember what they said  
That life is best enjoyed after death

There is a place where the evil can rest  
Let's draw a circle and take out their nest  
Into the fire, we all been misled

Battle is raging prepare to attack  
Made out of fire they clobber my back  
The living and dead in a final ballet

Let's summon the dead,  
We all stand together  
But we thought the spirits  
Would rest on this day  
How could we be so blind,  
Stop the dance start the slay

All of the damned - dia de los muertos  
All of the damned - los angelitos, los inocentes  
So listen, beware, remember what they said  
That life is best enjoyed after death
