"Hangover Heart"

Visit "[Hangover Heart](#)" on MotoLyrics.com

I've got a hangover heart from your kisses last night
My head is so heavy the tears blind my sight
You no longer love me you said we must part
And all I have left is a hangover heart
Too much wine from the bottle makes you feel bad next
day
But take another drink and that feeling goes away
But tell me my darling just how I should start
To take away the pain of this hangover heart
[fiddle]
No pills from the doctor no drugs from the store
Will help me forget the one I adore
I don't need a doctor no nurse with her charms
All I need is you for my hangover heart
I could go get more kisses from somebody new
But tell me my darling what good will it do
Come back to me baby let's make a new start
And take away the pain of this hangover heart
