You use me, then refuse me
Oh you brought this lovesick heart so much pain

You abused me, confused me
But still I love you just the same

I can recall when I came first of all
Lord I thought our love would never change

But you use me, confused me
But still I love you just the same

I can recall when I come first of all
And I thought our kind of love would never change

But you used me, confused me
But still I love you just the same

But honey still, you know I love you just the same
