I like driving those old dirt country roads
I love to listen to the sound of crickets on my back
porch
I like catching fish on a cane pole just about sundown
time
My kind of action is country relaxin'

I love four wheelin' up into the mountains
I like the white water of mother nature's fountains
I love the high places without the traces
of the noise and the smoke and factories
My kind of action is country relaxin'

Now our lifestyle today is come and go and run
But people can never forget where they all came from
From the small towns and the big mountains and the
country side of life
Ah and oh so many people wish they could go back
tonight

I love being with my sweet country girl
And getting loud and being proud of our special world
And if I die before the morning Lord let my soul be
warming
Knowing till the end of time I'll be in this frame of mind
'Cause my kind of action is country relaxin'

Now our lifestyle today is come and go and run
But people can never forget where they all came from
From the small towns and the big mountains and the
country side of life
Ah and oh so many people wish they could go back
tonight
Ah and oh so many of us wish we could go back tonight
