I've been all around, big cities country towns
Lovers I've had quite a few
But the older I grow, the more that I know
It's different with you

Society pays and sun tan bays
The game I've played by the rules
Oh I used to be the sort who thought love was a sport
But it's different with you

A sincere warm smile
And a soft easy style
Where things I've never knew
So I guess this is love but one thing I'm sure of
Its's different with you

And now I have learned
And to whom it may concern
It's different with you

It's different with you
It's different with you
