Coca-Cola changed until so many complained
They went back to the real thing
Nothing ever stays the same

ATT or MCI, either way you go the price is high
You can't always trust a name
When something is good why does it change

Ford and Cheverolet, they're making these smaller
cars these days
I miss my old '68
When something's good why does it change

Clint Eastwood and ol' John Wayne
They love cowboys, they love trains
Riding across the silver screen
You see they were smart, they never changed

So why should me and you
Go through what were going through
When all we've gotta do
Is just love each other true

It was so easy to say
I love you to you each day
But now our eyes are filled with pain
When something is good why does it change
