I want to dedicate this song to every working man and woman in this country and everyone that's trying to run a business and constantly punished, taxed and regulated by the federal government
I'm gonna call up a talk show I'm gonna give 'em a piece
I don't give a damn about Iran or the Middle East
Cause they been fightin' for about 2,000 years you see
And we send billions to Mexico and Zimbabwe
Well I think it's time for America to watch her own store
So here is my question to everyone
Who is taking care of number one yeah
New Hampshire got it right live free or die
Don't tread on us and tell us how to run our life
Don't matter where you go everyone would like to know
Can Washington DC mind the store
Is there a soul still down on the farm
And who is taking care of number one
Our glorious leader just got back from China and Japan
Where he gave away our job put us down and sold out our plan
Well people here at home are tired of failed programs and loans
I believe they're ready to change all this stuff that's going on
Yeah it's time for America's to mind their own store
And here is my question for everyone
Who is taking care of number one
New Hampshire got it right live free or die
Don't tread on us and try to run our life
No it don't matter where you go everybody would like to know
Can Washington DC run a store no
Is there a soul still down on the farm
And who is taking care of number one
