We're all on the edge of time  
Yet we're still too blind to see what we've done  
What all about these crimes hidden in our minds  
Can you bare the pain?

Once the snake led us into temptation  
Snared in its pit, no hope for our salvation

[Bridge I:]  
There is no heaven without a hell

Men defied the law, burning, killing all  
Living in a fear darker than their souls

[Bridge II:]  
There is no day without the night  
There is no black without the white

[Chorus:]  
Twisted maze of endless darkness, I will lead the way  
Take my hand, unearth my wisdom heed what I say  
Strive on, strive on, we've got to hold on,  
We've got to go on  
Strive on, strive on, together as one,  
The sun won't shine on in vain

[Solos]

Now the snake slithers back to its hole  
Drags with him the souls that he stole

[Final Bridge:]  
There are no sins without sinners  
There is no evil without man

[Repeat Chorus]
