We're in a sea full of sharks
Just swimming around and around if we get caught
There guna taste our blood
You leave a trail and the word will get out
That we're all lost and ready to kill
That we're all lost and ready to kill
Only act that way when your feeling vulnerable and I
don't want to play
I don't have the nerve like you
Your spreading the seed and all I want to do
I bury you deep deep down in me
I bury you deep deep down in me
Are you guna make an enemy of me
Are you my enemy
Are you guna make an enemy of me
Are you my enemy
It's to deep of a cut to mend
And there is no way we can go back, go back again
And this is what we've got this is what we've go to live
with
And this is what we've got this is what we've go to live
with
Are you guna make an enemy of me
Are you my enemy
Are you guna make an enemy of me
Are you my enemy
Are you my enemy
You're my enemy
Yea you're me enemy
