See I'm just the one,
The one who looks over,
A timid and shy smile,
If only I could be bolder,
I know I could try,
But I don't think those words would come out right,
But I know I could try,
So here it goes,

Did you happen to know,
I won a spelling bee,
When I was only in grade three,
Did you happen to know,
I placed third in a speech meet,
When I was in grade three,

So what was it like,
When you were young at seventeen,
I know I tried,
To fight a chick twice the size of me,
You know that I lied,
Just so I could stay out all hours of the night,
Just to stay out all night,

Let's talk about love,
Let's laugh about life,
Let's sing about the stars,
Let's drive into the night,
Let's talk about love,
Let's laugh about life,

So what was it like,
When you had your first kiss,
I remember mine,
Just cause you practically missed,
What was it like,
When you had your heart broken,
I know I cried,
And it took a while to feel whole again,

Let's talk about love,

Let's laugh about life,
Let's sing about the stars,
Let's drive into the night,
Let's talk about love,
Let's laugh about life,

And we're all getting older,
And it's time to figure out why,
Our hearts are growing colder,
All all feeling tangled up inside,
But if it's love that we're looking for,
I know we can give a little more,
Is it bad that we just want to be held,
I just want to be held,

Let's talk about love,
Let's laugh about life,
Let sing about the stars,
Let's drive into the night,
Forget about the day,
And look forward to tonight,
Let's not worry about right now,
Let's try and answer why,
Let's just open up our hearts,
And sit here for awhile,
Let's talk about love, [x5]
