Wherever you may go
No matter how unknown
Don't ever feel alone
You've gotta place called home

And if you think you'll fall
I'll catch you out my love
You threw it all
A million miles away
It aint to far for you-
To hear me say

And what if you don't add up
To what you're meant to be
And what if down this road
You find it's never quite as easy as it seems

Wherever you may go
No matter how unknown
Don't ever feel alone
You've gotta place called home

So hear me say
The world keeps spinning
No matter what they say
And when your thoughts are swiming
Best to let the
Get in your way
'Cause I know you can get caught up
And what you plan doesn't always work out
The way that you're hopping for
So I say
Baby don't think that way

Wherever you may go
No matter how unknown
Don't ever feel alone
You've gotta place called home
